

Vinyl Resin (CH)

Items	Standard
Appearance	White
Granularity(40 mesh) %	100
Adhesion Number ml/g	54~56
Sight Specific Gravity (ASTM-D792)	0.50~0.70
Volatile % max	1
Impurity number /100g max	20
Composition	
Percent vinyl chloride %	82.9~85.2
Percent vinyl acetate %	13~15.0
Percent Maleic acid %	1.8~2.1
Solubility (20% MEK & Toluene Solution)	Colorless transparent

Applications

CH vinyl resin is used to make heat-sealable packaging coating and adhesives, metal food can linings, and maintenance and marine coatings, as well as a wide variety of clear and pigmented inks and coatings for paper, film, foil, and fabric.

Advantages

- 1.Highly flexible, post-formable coatings on metal coil and sheet
- 2.Adhesion to vinyl, metals, concrete, and cellulosic substrates
- 3.Tasteless, odorless
- 4.Conform to regulations for use in food and medicine applications
